

Mini Channel for 3/8" Glass Clamp

SKU: MINI U

Specifications:

Glass sizes: 3/8" (10mm) thick-tempered safety glass
Construction: Brass

MATERIALS:

Brass

FEATURES:

- No glass fabrication required
- Sleek and modern design help achieve a clean frameless look

USE:

- To ensure proper stability, stationary glass panels require support and attachment along a minimum of three sides. The quantity of mini channels necessary to secure a panel varies based on its dimensions and weight. Determining the appropriate type, number, and placement of mini channels should be entrusted to a qualified installer.
- The glass panel is securely affixed using silicone caulk, providing a reliable and resilient bond that ensures its stability.
- Specifically designed for use with 3/8" (10 mm) thick tempered glass panels

WARRANTY:

For proper maintenance, Glaze Hardware recommends to clean the Mini U's using water and a soft cloth. Avoid the use of harsh or abrasive chemicals, as they can potentially damage the finish and void the warranty.

CLEARANCES:

Although components in the mini channel system do not require individual cutouts, clearance values must be taken into account and deducted from width of opening when sizing a glass panel.

Subtract 1/8" (3mm) from sides to be supported by mini channels.

INSTALLATION NOTE:

Glass panels should be secured with silicone caulk.
